Dear Parents/Carers of Year 7 Students

I am writing to inform you that, following the recent CATs tests that the year 7 students have undertaken and the baseline year 7 maths test, we have now placed the students into their appropriate maths sets.

This has been carried out so that the correct support can be given to our students and for them to be taught at the right pace and with the right amount of students in their class. None of these sets are permanent and there will be changes made regularly to ensure students are supported so that they make the most progress possible. Every class will still follow the same scheme of work at the same time.

Please note that the changes to their sets will commence after half term and the information as to which sets the students are in, will not be available until this time.

Yours faithfully

Natasha Widmer
Assistant Principal for Maths
